

## **EV Conversion Components – Legal & Safety Disclaimer**

The products sold by Scotten Motors are intended for use in electric vehicle (EV) conversion projects and custom vehicle applications. By purchasing, installing, or using any components supplied by Scotten Motors, you acknowledge and agree to the following:

### **A. Intended Use and Installer Responsibility**

All EV conversion components are intended for installation by qualified professionals or individuals with appropriate technical training and experience in high-voltage electrical and mechanical systems. Scotten Motors does not supervise or control the installation, integration, or final use of any products sold. The purchaser and/or installer assumes full responsibility for ensuring that all components are installed safely and correctly.

### **B. Regulatory Compliance**

Vehicle modification and electrification may be subject to federal, state, and local laws and regulations, including safety inspections, emissions exemptions, registration classifications, and roadworthiness standards. It is the sole responsibility of the purchaser and/or vehicle owner to ensure that any converted vehicle complies with all applicable laws, ordinances, and regulatory requirements in the jurisdiction in which the vehicle will be operated.

### **C. Compatibility and Application**

EV conversion projects frequently involve legacy or modified vehicle platforms. Scotten Motors makes no representations or warranties regarding the compatibility of any component with a particular vehicle, chassis, drivetrain, or third-party system unless expressly stated in writing. Improper integration of electrical or mechanical systems may result in vehicle malfunction, component damage, or unsafe operating conditions.

### **D. High-Voltage Safety Notice**

Many EV conversion components operate at potentially lethal voltage and current levels. Installation, service, or operation of high-voltage systems carries inherent risks, including electrical shock, thermal injury, fire, mechanical injury, or death. Appropriate personal protective equipment (PPE), insulated tools, and safety procedures should be used at all times when handling or installing EV components.

## **E. Off-Road / Experimental Use**

Unless otherwise explicitly specified, EV conversion components are sold for off-road, experimental, or custom vehicle use only. Scotten Motors does not certify that any individual component or integrated system is compliant with Federal Motor Vehicle Safety Standards (FMVSS) or other roadway safety regulations when installed in a converted vehicle.

## **F. Warranty and Returns**

Due to the sensitive nature of electrical components, including battery modules, motor controllers, and power electronics, any product that has been installed, modified, energized, or physically altered is not eligible for return unless otherwise expressly stated or required by applicable law. Damage resulting from improper installation, misuse, or integration with incompatible systems is not covered under any limited warranty provided by Scotten Motors.

## **Indemnification Clause**

To the fullest extent permitted by applicable law, the purchaser, installer, vehicle owner, and end user (collectively, the "Customer") agree to defend, indemnify, and hold harmless Scotten Motors, its officers, directors, employees, contractors, affiliates, successors, and assigns from and against any and all claims, demands, damages, losses, liabilities, costs, and expenses, including reasonable attorneys' fees and court costs, arising out of or related to:

- (i) the installation, integration, modification, or use of any products supplied by Scotten Motors;
- (ii) the incorporation of Scotten Motors components into any vehicle or system not designed, assembled, or installed by Scotten Motors;
- (iii) any failure by the Customer to comply with applicable federal, state, or local laws, regulations, or safety standards governing vehicle modifications or electric vehicle systems;
- (iv) improper installation, misuse, alteration, or operation of any component, including use in a manner inconsistent with provided instructions or industry safety practices;
- (v) any personal injury, death, property damage, or economic loss resulting from the installation or operation of EV conversion components supplied by Scotten Motors.

This indemnification obligation shall apply regardless of whether such claims arise in tort, contract, strict liability, or otherwise, except to the extent such claims are finally determined by a court of competent jurisdiction to have resulted solely from the gross negligence or willful misconduct of Scotten Motors.

The Customer agrees that Scotten Motors shall have the right, but not the obligation, to assume the defense and control of any matter subject to indemnification under this provision.
